Lab Assignment 05

Inspiring Excellence

Course Code:	**CSE111**
Course Title:	**Programming Language II**
Topic:	**Multi-class Design**
Number of Tasks:	**10 (Classwork: 05, Homework: 05)**

[You are not allowed to change the driver codes of any of the tasks]

CLASSWORK

After YouTube Music, Spotify has decided to redesign their Playlist system. However, they decided to **not use arrays** to store their music, instead, they will use OOP concepts to create the new Playlist system. You have been assigned to build the system by using 3 classes (**Song**, **Playlist,** and **SpotifyTester**).
Each song will have the *name of the song*, *artist name*, *length of the song in minutes* and *the next song*. Each playlist will have a *name* and the *first* song. Playlists can contain multiple songs. Both classes will have some features which will be demonstrated in each task.

[You are not allowed to use Array or any built-in libraries for this assignment]

Task 1

Design the **Song** class with *constructor* and *songInfo()* method along with necessary attributes in such a way that it produces the following output.

Driver Code	Output

`public class SpotifyTester {`
`  public static void main(String[] args) {`
`  Song s1 = new Song("Song-A", "Artist-A", 3);`
`  System.out.println("1==========");`
`  s1.songInfo();`
`  System.out.println("2==========");`
`// More lines will be added in this Tester class`
	`1==========`
	`Title: Song-A,  Artist: Artist-A`
	`Length: 3 minutes`
	`2==========`

Task 2

Design the **Playlist** class *constructor* along with necessary attributes in such a way that it produces the following output.

Driver Code	Output

`  System.out.println("2==========");`
`// Continuation from Task 1`
`  Playlist p1 = new Playlist("First Playlist");`
`  System.out.println("3==========");`
	`2==========`
	`First Playlist created.`
	`3==========`

Task 3

Create *info()* method inside the **Playlist** class to produce the following output.

Driver Code	Output

`System.out.println("3==========");`
`// Continuation from Task 2`
`p1.info();`
`System.out.println("4==========");`
`p1.start = s1;`
`p1.info();`
`System.out.println("5==========");`
`Song s2 = new Song("Song-B", "Artist-B", 4);`
`Song s3 = new Song("Song-C", "Artist-C", 2);`
`p1.start.next = s2;`
`p1.start.next.next = s3;`
`p1.info();`
`System.out.println("6==========");`
